# CHOP KING

2014

The 14 in. Chop King blade is our newest **DX technology** blade for cutting;

- metal studs
- rebar
- angle
- structural steel
- non-ferrous materials

It will outlast up to **60 abrasive wheels** and is much safer thanks to the solid steel core which virtually eliminates breakage. The high-quality diamonds are bonded to the core using **DX brazing technology**, ensuring lasting performance, cut after cut.

*Use only on low HP Chop Saws.*
