

DIAMOND[®]X

CUTTER

The DX Cutter family has a new big brother designed to do the big jobs of metal cutting abrasive wheels.

The 14" DX Cutter is technologically superior with;

- Newly designed proprietary patented core that withstands the rigors and abuse of continuous metal cutting with a portable 14" high speed gas cutoff saw.
- No core fatigue, cracking or wobbling, as with rescue diamond blades.
- Proprietary new unique brazing compound along with exceptionally high grade diamonds that greatly extend the life of the blade.
- Up to 70 times life compared to abrasives which means up to 69 fewer blade changes.

DIAMOND[®] CUTTER

Why use abrasive blades when they...

- Wear down and lose depth of cut.
- Break.
- Can't be used with water or get wet.
- Need to be changed when going from metal to ductile iron.
- Give off abrasive dust, and debris which clogs saw filters.
- Give off odor from phenolic resin, sulfur, and other hazardous components.

DiamondX solves all these problems plus.....

Just the labor cost of 25 blade changes
(8 minutes per change) will pay for one DX Cutter.

Sheet Metal	Pipe	Metal Plate	Round & Sectional Tubing	Steel Bar	Rebar	Angle Iron
Cast Iron	Ductile Iron	Metal Studs	Carbon & Mild Steel.	Non Ferrous Metals	Stainless	PVC Masonry Concrete

Size	Spec	P/N	Max RPM	List Price
14 x .145 x 1-20MM	DX Cutter	00783	5400	\$410
