

DIAMONDTM

CUTTER

- The Edmar DiamondX® Cutter is an all-new thin diamond blade that **replaces .040/45 thin abrasive blades.**
- DiamondX® Cutter will **cut virtually any metal** including steel and stainless steel.
- Now available in smaller diameter and arbor for **die grinders.**

- **Makes more cuts** than 20, 30, 50 or more abrasive discs, depending on the application.
- The **cost savings** from abrasive wheel changeovers alone can offset the cost of one DiamondX® Cutter.
- **Will not break or shatter** if dropped or if exposed to water
- **Safely de-burr flashing** from cuts using blade edge (unlike abrasives that can be dangerously damaged by this procedure).
